

Fahad Farooq

MERN Stack & WordPress Developer

✉ fahadfarooq2003@gmail.com

EDUCATION

Associate Degree In Computer Science, *Air University*

01/09/2023 – 01/07/2025

ABOUT ME

MERN Stack & WordPress Developer with hands-on experience building responsive business websites, landing pages, and web applications using WordPress, Elementor, HTML, CSS, JavaScript, React, Node.js, and MongoDB. Experienced in customizing WordPress websites, implementing responsive UI, troubleshooting frontend issues, integrating APIs and third-party services, and applying on-page SEO and performance best practices. Have practical experience delivering websites for real-world clients and collaborating through Git/GitHub.

WORK EXPERIENCE

Freelance Web Developer, *Remote* 2025 – Present

- Develop and customize responsive business websites and landing pages using WordPress, Elementor Pro, HTML, CSS, and JavaScript.
- Convert design references and business requirements into responsive, user-friendly web interfaces across desktop, tablet, and mobile devices.
- Customize existing WordPress websites, troubleshoot layout and functionality issues, and implement content, styling, and structural changes.
- Apply on-page SEO practices including page titles, meta descriptions, heading structure, image optimization, and basic Google Search Console setup.
- Build and deploy React/Vite websites using Tailwind CSS, React Router, and modern frontend development practices.
- Integrate third-party services and APIs, including cloud media storage, email services, analytics/tracking tools, and external website functionality.
- Work directly with clients to understand requirements, implement revisions, troubleshoot issues, and deliver production-ready websites.
- Use Git and GitHub for version control and project collaboration.

PROJECTS

Sophy Experience – Luxury Event Services Website, *WordPress | Elementor Pro | Figma | GHL*

- Converted the client's Figma design into a polished, responsive WordPress website using Elementor Pro, maintaining visual consistency across desktop, tablet, and mobile.
- Built conversion-focused service, package, gallery, testimonial, FAQ, and enquiry sections with clear CTAs to support customer engagement.
- Applied on-page SEO and performance optimization practices, including structured content, responsive media, and optimized page layouts.
- Integrated GoHighLevel forms and lead-capture workflows with the WordPress website.

Leicester Google Ads – Lead Generation Website, *WordPress | Elementor Pro | Figma | GHL*

- Translated the client's Figma design into a responsive, conversion-focused WordPress website using Elementor Pro.
- Developed service, pricing, case study, testimonial, FAQ, and lead-generation sections with enquiry forms, WhatsApp integration, and strategic CTAs.
- Applied on-page SEO, performance, and mobile optimization practices to improve usability and support lead generation.
- Integrated GoHighLevel forms and lead-capture workflows with the WordPress website.

RZ Marble & Tile – WordPress Business Website, *WordPress | Elementor Pro | SEO*

- Developed and customized a professional business website using WordPress and Elementor Pro.
- Created responsive page layouts optimized for desktop and mobile devices.
- Structured service-focused content and page elements to support search visibility and user navigation.
- Implemented on-page SEO improvements including metadata, headings, and search-engine-friendly page structure.
- Worked on Google Search Console integration and website troubleshooting.

Islamabad Rent Cars — React Web Application, [React](#) | [Vite](#) | [Tailwind CSS](#) | [React Router](#)

- Developed a responsive car rental website from scratch based on client requirements and reference websites.
- Built reusable React components and structured navigation using React Router.
- Implemented responsive layouts with Tailwind CSS for desktop, tablet, and mobile devices.
- Applied basic on-page SEO and performance optimization practices.
- Collaborated through Git/GitHub and deployed the production website to a live domain.

E-Commerce Frontend Development, [HTML5](#) | [CSS3](#) | [JavaScript](#) | [jQuery](#) | [Bootstrap5](#) | [SQL](#) | [APIs](#)

- Customized two production e-commerce storefronts (Pro420, CoastalNVG) on a proprietary commerce platform with built-in backend functionality, extending frontend features to meet client requirements.
- Developed and enhanced product/shop pages, dynamic pricing displays, category navigation, wishlists, reviews, forms, lazy loading, and interactive UI components using HTML, CSS, and JavaScript.
- Integrated existing platform APIs and SQL-driven functionality, while implementing Klaviyo tracking, customer events, product data handling, and conversion-focused UI improvements.
